

Hardcoded Font-Size Inventory

Theme: shopify-live · 366 literal font-size declarations · Generated 2026-06-30

How to read this: every place a font-size is written as a fixed value (px/rem/em) instead of routing through the theme's size settings. **"Agency"** = added by the previous agency (everything in `main.css` and the custom/about/videos sections). **"No"** = Broadcast theme defaults (`theme.css`) — changing these affects the base theme. "Page/Section" is where it renders (best-effort for shared CSS).

assets/main.css — agency-compiled overrides AGENCY (144)
